Trimble R750
GNSS RECEIVER

KEY FEATURES
► Trimble® Maxwell™ 7 GNSS ASIC
► Advanced satellite tracking with Trimble 360 receiver technology
► Trimble ProPoint™ GNSS positioning engine. Engineered for improved accuracy and productivity in challenging GNSS conditions
► Convenient front panel display and configuration
► Wi-Fi and 4G LTE connectivity
► Bluetooth®, Ethernet, serial and USB support
► 8 GB internal memory
► Data logging internally and to external drive
► USB-C PD charging
► Support for RTK level precision Trimble CenterPoint® RTX corrections technology
► Trimble xFill® correction outage technology

**PERFORMANCE SPECIFICATIONS**

**GNSS MEASUREMENTS**
- Advanced Trimble Maxwell 7 Custom GNSS Chips with 336 channels
- Trimble EVEREST™ Plus multipath signal rejection
- Constellation agnostic, flexible signal tracking and improved positioning in challenging GNSS environments with Trimble ProPoint GNSS technology
- High-precision multiple correlator for GNSS pseudorange measurements
- Unfiltered, unsmoothed pseudo-range measurements data for low noise, low multipath error, low time domain correlation, and high-dynamic response
- Very low noise carrier phase measurements with <1 mm precision in a 1 Hz bandwidth
- MSS Band (2-channels): Trimble CenterPoint RTX correction service and OmniSTAR® by subscription
- Reduced downtime due to loss of cellular connectivity with Trimble xFill technology

| Performance rates: 1 Hz, 2 Hz, 5 Hz, 10 Hz, 20 Hz, 50 Hz |

**POSITIONING PERFORMANCE**

**STATIC GNSS SURVEYING**
- **High-Precision Static**
  - Horizontal: 3 mm + 0.1 ppm RMS
  - Vertical: 3.5 mm + 0.4 ppm RMS
- **Static and Fast Static**
  - Horizontal: 3 mm + 0.5 ppm RMS
  - Vertical: 5 mm + 0.5 ppm RMS

**REAL TIME KINEMATIC SURVEYING**
- **Single Baseline <30 km**
  - Horizontal: 8 mm + 1 ppm RMS
  - Vertical: 15 mm + 1 ppm RMS
- **Network RTK**
  - Horizontal: 8 mm + 0.5 ppm RMS
  - Vertical: 15 mm + 0.5 ppm RMS
- **RTK start-up time for specified precisions**
  - 2 to 8 seconds

**TRIMBLE RTX CORRECTION SERVICES**
- **CenterPoint RTX**
  - Horizontal: 2 cm (0.06 ft) RMS
  - Vertical: 5 cm (0.16 ft) RMS
  - RTX convergence time for specified precisions in Trimble RTX Fast regions: < 1 min
  - RTX convergence time for specified precisions in non RTX Fast regions: < 3 min

**TRIMBLE xFILL**
- Horizontal: RTK° + 10 mm (0.03 ft)/min RMS
- Vertical: RTK° + 20 mm (0.06 ft)/min RMS

**TRIMBLE xFILL PREMIUM**
- Horizontal: 3 cm RMS
- Vertical: 7 cm RMS

**CODE DIFFERENTIAL GNSS POSITIONING**
- Horizontal: 0.25 m + 1 ppm RMS
- Vertical: 0.50 m + 1 ppm RMS
- SBAS°: typically <5 m 3D RMS

| Keyboard and display | Display 32 characters by 4 rows  
On/Off key for one-button startup  
Escape and Enter keys for menu navigation  
4 arrow keys (up, down, left, right) for option scrolls and data entry |
| Dimensions (L × W × D) | 269 mm (10.6 in) x 141 mm (5.5 in) x 61 mm (2.4 in) |
| Weight | 2.05 kg (4.52 lb) |
| Temperature |  |
| Operating | -40 °C to +65 °C (-40 °F to +149 °F) |
| Storage | -40 °C to +80 °C (-40 °F to +176 °F) |
| Humidity | 93% humidity at 40 °C for a duration of 3 hours (IEC-60945 Method 8.3) |
| Ingress Protection | IP67 for temporary submersion to depth of 1 m (3.3 ft), dustproof |
| Shock and vibration |  |
| Pole drop | Designed to survive a 1.1 m (3.6 ft) pole drop onto a hard surface |
| Shock - Non-operating | To 75 g, 6 ms |
| Shock - Operating | To 40 g, 10 ms, saw-tooth |
| Vibration | IEC 60945 Method 8.7  
Random 6.2 g RMS operating  
9.8 g RMS 24-2000 Hz for 1 hrs each axis survival |
| **ELECTRICAL** |  |
| Internal | Integrated internal battery 7.26 V, 6700 mAh, Lithium-ion  
Internal battery operates as a UPS during an ext power source failure  
Internal battery will charge from external power source as long as source can support the power drain and is more than 12.5 VDC  
Integrated charging circuitry |
| External | Power input on 7-pin O-shell Lemo connector is optimized for lead acid batteries with a cut-off threshold of 11.5 V, Maximum 28 VDC  
Power input on the 26-pin D-sub connector has a cut-off threshold of 10.5 V  
Power source supply (Internal/External) is hot-swap capable in the event of power source removal or cut off  
DC external power input with over-voltage protection  
Receiver automatically turns on when connected to external power |
| Power consumption | 6.6 W in rover mode with internal receive radio  
8.5 W in base mode with internal transmit radio  
5.7 W in rover mode with internal LTE modem  
6.1 W in base mode with internal LTE modem |
| Operation time on internal battery | Rover  
7 hours 450 MHz UHF receive  
8.5 hours cellular receive (Internal or Controller via Bluetooth)  
Base station  
4.8 hours 2.0 W 450 MHz transmit  
5.5 hours 0.5 W 450 MHz transmit  
7.4 hours cellular transmit |

COMMUNICATIONS AND DATA STORAGE

| Serial 1 (COM1)                  | 7-pin OS Lemo, Serial 1, 3-wire RS-232 |
| Serial 2 (COM2)                  | 26-pin D-sub, Serial 2, 5-wire RS232, using adaptor cable (Selectible) |
| Serial 3 (COM3)                  | 26-pin D-sub, Serial 3, 4-wire RS422, using adaptor cable (Selectible) |
| Serial 4 (COM4)                  | 26-pin D-sub, Serial 4, 4-wire RS422, using adaptor cable (Selectible) |
| IPPS (1 Pulse-per-second)        | Supported on both Lemo and 26-pin D-sub |
| Event In                        | Supported on Lemo |
| USB                             | USB v2.0 (Supports USB-PD charging) |
| Ethernet                        | Through a multi-port adaptor |
| Wi-Fi                           | Fully-integrated, fully-sealed 2.4 Wi-Fi module Simultaneous Access Point (AP) and Client modes |
| Bluetooth wireless technology   | Fully-integrated, fully-sealed 2.4 GHz Bluetooth module|

NETWORK PROTOCOLS

- HTTP (web browser GUI) HTTP, HTTPS
- NTP Server Yes
- TCP/IPv4 or UDP Yes
- NTRIP NTRIP v1 and v2, Client Server and Caster modes
- mDNS/UPnP Service discovery Yes
- Dynamic DNS Yes
- eMail alerts Yes

INTEGRATED UHF RADIO

- Frequency: 450 MHz
- Bandwidth: 1.5 kHz
- Power: 0.5 W, 2.0 W (2.0 W available only in certain countries)
- Channel Spacing: 125 kHz
- GPS L1 C/A: 1.04057 MHz
- GPS L2 C/A: 1.02040 MHz
- Galileo E1: 1.60171 MHz
- GLONASS: 1.60565 MHz
- Beidou: 1.26859 MHz
- SBAS: 1.60622 MHz

CELLULAR SUPPORT

- Internet-based correction streams: (iBSS, VRS, NTRIP) Internal LTE modem Connected smartphone Connected Trimble Controller [Trimble Access™]
- Remote access Using DynDNS and appropriate service
-サポートデータフォーマット
- コレクション入力 CMRx, CMR+, CMR, RTCM 2.0, RTCM 3
- コレクション出力 RTCM 2.0, CMR, CMR+, CMRx, RTCM 3
- データ出力 NMEA 0183, GSOF, IPPS Time Tags

 Specifications subject to change without notice.
1. Challenging GNSS environments are locations where the receiver has sufficient satellite availability to achieve minimum accuracy requirements, but where the signal may be partly obstructed by and/or reflected off of trees, buildings, and other objects. Actual results may vary based on user’s geographic location and atmospheric activity.
2. The current capability in the receivers is based on publicly available information. As such, Trimble cannot guarantee that those receivers will be fully compatible with a future generation of Galileo satellites or signals.
3. Precision and reliability may be subject to anomalies due to multipath, obstructions, satellite geometry, and atmospheric conditions. The specifications stated recommend the use of stable mounts in an open sky view. EMI and multipath-clean environment, optimal GNSS constellation configurations, along with the use of survey practices that are generally accepted for performing the highest-order surveys for the applicable application. Achievable accuracy and initialization time may vary based on type and capability of receiver and antenna, user’s geographic location and atmospheric activity, scintillation levels, GNSS constellation health and availability and level of multipath including obstructions such as large trees and buildings. Average initialization times when using GPS, GLONASS, Galileo, and BeiDou.
4. Networked RTK PPM values are referenced to the closest physical base station.
5. May be affected by atmospheric conditions, signal multipath, obstructions and satellite geometry. Initialization reliability is continuously monitored to ensure highest quality.
6. RMS performance based on repeatable in field measurements. Achievable accuracy and initialization time may vary based on type and capability of receiver and antenna, user’s geographic location and atmospheric conditions.
7. Accuracies are dependent on GNSS satellite availability, eFill positioning without an eFill Premium subscription ends after 5 minutes of radio downtime. eFill Premium will continue beyond 5 minutes providing the solution has converged, with typical precisions not exceeding 3 cm horizontal, 7 cm vertical.
8. RTK refers to the last reported precision before the correction source was lost and eFill started.
10. Depending on -55 °C ambient when the device is powered by external DC supply and the battery is fully charged or is not being charged.
11. More certification is available upon request.
